DETAILED ACTION

Response to Amendments

1. The amendment filed by the applicant on 12/22/2006 is acknowledged and has been entered into the records. The applicant has amended claims 1, 7-11, 13, 26-29, 30-32, 41-42 and 44-45. Claims 6 and 12 have been cancelled previously. Claims 1-5, 7-11, and 13-45 are currently pending in the application.

Applicant's amendment of claim 13 has necessitated the new ground(s) of rejection presented in this Office action.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Amended claim 13 has a sensor to determine a pressure of the aerosol. Amended claim 13 also refers to "the sensor" (first instance on line 5 and the second instance on line 8). It is not clear if one of the sensors is for determining the pressure and the other sensor is for determining the airflow, or if both sensors are for sensing airflow, or if both sensors are for sensing pressures. Also, question arises what is being done with the output of the pressure sensor. There is no reference of the use of the output from the pressure sensor in the claim. The volume calculation is based on the light scattering and airflow signal. This ambiguity has made the claim vague and indefinite. Appropriate correction is required.

Terminal Disclaimer

4. The terminal disclaimer has not been submitted by the applicant, or is missing from the file/records. Appropriate correction is required.
